Education :

Parul University	Vadodara,Gujarat.
Bachelors of Computer Application.	August 2022 – August 2025.

Vidhyut Board Vidhyalaya	Vadodara,Gujarat.
Second Higher Education.	2021 – 2022.

Experience :

AccioJob | Software Developer Trainee   Vadodara | OCT 2024 – MAR 2025.

- Gained hands-on experience in frontend development, focusing on building user-friendly web applications.
- Strengthened skills in JavaScript, React, and modern UI/UX design principles during the internship.
- Developed practical knowledge in creating responsive and interactive web interfaces.
- Improved ability to design and implement engaging, high-performance web applications.

Skills :

- Programming Languages: JavaScript, HTML, CSS.
- Libraries/Frameworks: React, Bootstrap.
- Tools / Platforms: Git, GitHub.

Projects :

YouTube Clone | ⚙   *- JavaScript, HTML, CSS.*

- Developed a responsive YouTube clone featuring a **trending videos page**, **search functionality**, and **video playback** using the YouTube Data API v3.
- Integrated **Google Cloud YouTube API** to dynamically fetch and display real-time video data based on trends and search queries.
- Implemented **user authentication (sign-up/login)** using Firebase Authentication to manage secure access.
- Ensured responsive design and mobile compatibility using modern HTML/CSS practices.

Google Sheet Clone | ⚙   *- JavaScript, HTML, CSS.*

- Built a browser-based Google Sheets clone with core spreadsheet functionalities using only **vanilla JavaScript, HTML, and CSS**.
- Implemented **text styling** features like bold, italic, underline, and font size adjustments through dynamic DOM manipulation..Created a **formula bar** to parse and display expressions entered by the user (e.g., `=A1+B1`).
- Enabled **text alignment** (left, center, right) and **cell selection features**, mimicking real spreadsheet behavior.
- Emphasized performance and clean UI design without using external libraries or frameworks.

Spotify UI | ⚙   *- HTML, CSS.*

- Designed a **2-page static clone** of Spotify's user interface using only HTML and CSS.
- Recreated key sections such as **homepage layout And liked songs layout.**

Blinkit UI | ⚙   *- HTML, CSS, Bootstrap.*

- Developed a **static clone of Blinkit's homepage** using HTML with Bootstrap layout components and inline CSS for custom styling.
- Recreated major sections like **navigation bar**, **search bar**, **category cards**, and **product grid** to mimic Blinkit's visual structure.
- Used **Bootstrap utilities** to achieve responsive design and quick alignment without external CSS files.
